Concerned You Will Not Retire In Comfort?

By Joshua Geary

Traditionally people have considered their retirement 401Ks and IRAs to be like safety nets rather than wealth builders. However, with the self directed IRA, you need not be satisfied with growth rates in the single digits. It is possible to realize phenomenal growth potential outside of the traditional IRA markets, tripling and quadrupling your IRA's value is not uncommon, within relatively short period of time. It will not just happen, however. You have to take the reins of your retirement portfolio, put in the time and effort, and do your research. The possibilities are endless to those who are prepared to make the investment paradigm shift.

Most savvy investors, due to the ups and downs of the stock market, are frankly not as confident as they once were in the old financial planner adage that the stock market is going to go up forever. If your memory is a little foggy, then reflect back just a few short years.

Concerned that you will not retire in comfort? Put your IRA money to work and truly diversify your IRA portfolio with alternative investment vehicles. Your banker and broker will not allow you to invest in alternative investments because they want complete visibility and control over your IRA. In the meantime, they are earning fantastic returns on your money. Isn't it time you take the driver's seat.

Fundamentally, what do you need?

- Sufficient funds in your self-directed IRA.
- Intimate knowledge of a permissible alternative investing strategy for the IRA (such as real estate investing, purchasing discounted paper, private money lending, or gold investing)
- A Self-Directed IRA Advisor that can share valuable information and advice.
- A low fixed annual fee to pay your custodian, while you maintain full checkbook control at all times. You – not they – issue the checks for managing your investment.

Provided you satisfy IRA regulations on the type of investments allowed for your self-directed IRA funds (real estate is only one of several possibilities), you can take charge of your financial future by turning that IRA into a high-earning instrument.

The IRS's position is clear, as defined in their publication # 590: your IRA should be a separate and distinct entity from yourself. Whatever investments you make should benefit your IRA, and not you directly. Your self directed ira advisor will be able to explain the subtleties and refinements of this IRS publication.

It's your money. If we told you that there are about \$7 trillion dollars sitting in IRAs but of that amount, only 3% are self-directed, wouldn't you be curious about how you can be part of that 3% that unknown to most, are enjoying unheard of returns?

Dan Cordoba (CEA) Asset Exchange Strategies, LLC and Joshua Geary with Best Online Results turns your learning curve into a fast and easy profit curve by providing tips and trends that are affecting the self directed IRA real estate market. Early Retirement: What You Should Know

By Stanley Emerson

For many reasons, more and more people are opting to retire at an early age. The growing trend for the retirement is based on the fact that people are enticed to retire early than continue working and wait until they reach their retirement age of 65.

In fact, most of the surveys conducted in the United States asserted that 60% of the respondents would love to retire at an early age.

In reality, there are many benefits that people can derive when they retire early. However, there are also many consequences that result from early retirement. What they do not know is that early retirement has the potential of bringing more problems than reaping in benefits and advantages.

Here is a list of some of the reasons why retiring early can be a pretty risky activity.

1. Not in accordance with the regulations of Social Security

When people will retire at an early age, there is a great possibility that they cannot immediately obtain their Social Security benefits. This is because according to the rules and regulations of Social Security, anyone who is born after 1938 will have to wait longer than their retirement age of 65 before they can get their benefits.

Hence, early retirement may only contribute to a negative upshot if the older people's finances were not managed properly and the only thing they expect to help them are the Social Security benefits they can get.

2. If people who took early retirement get sick, they cannot acquire some Medicare benefits.

This is because the age when people can get their Medicare benefits is when they already turn 65. Hence, if they are hospitalized and they have already filed for their early retirement, they have to obtain the necessary amount of money in order to cover the expenses in the hospital without Medicare.

3. Penalty charges apply to those who retired early and had withdrawn their IRAs early.

For people who would like to retire at an early age and wish to obtain their IRAs, they have to face a hefty 10% penalty charge.

Moreover, experts contend that the nest egg of people who wish to retire early is only 80% of what they should be getting when they retire at the age of 65.

The bottom line is that early retirement is, indeed, a personal choice and preference of an individual but one must consider the factors that may affect their life in the end.
